

## EcoSweep Leaders® Program

The EcoSweep Leaders® Program is an intelligent and cost-effective solution for organizations interested in pursuing Leadership in Energy and Environmental Design (LEED®) certification. With the EcoSweep Leaders® Program your organization can achieve nearly a third of the points necessary for basic certification. When combined with EcoSweep's consultation and performance capabilities, EcoSweep is one of the few companies that can self-perform the scope of services necessary to help you achieve LEED-EB certification.

For companies not wishing to pursue full LEED-EB certification, the EcoSweep Leaders® Program is a premium, affordable option that can play a key role in facilities maintenance, where a clean, attractive, healthy work environment is essential in attracting and retaining customers, employees and other occupants.

By launching the EcoSweep Leaders® Program, we are keeping our commitment to provide customers with the highest quality, environmentally conscious solutions. At EcoSweep, we take a leadership approach to green cleaning services using modern and state-of-the-art techniques imitated by others at a premium price.

Green cleaning is what we were founded on and top-down EcoSweep, continues to innovate in terms of the solutions we provide, tools, processes, training, service and support. Our clients stand above the rest by attracting and retaining customers, differentiating themselves from the competition and enjoying the health and environmental benefits EcoSweep encourages.

Whether your goal is the general benefit of LEED-EB standard or you are pursuing LEED certification, the EcoSweep Leaders® Program is the ultimate solution for your organization.

EcoSweep is a proud member of CaGBC.
